

Vacancy for a Student Assistant at PTG/e BV

PTG/e BV was established in 2004 as an independent knowledge institute. We specialize in and are fully equipped to perform research in the field of advanced hybrid and polymeric materials. Our research is carried out in our own labs in the Catalyst building at the Science Park of TU/e. As a subsidiary of the TU/e Holding Company, PTG/e is also able to make use of the university's excellent infrastructure. The growing demand for contract research by (inter)national companies results in the following PTG/e vacancy:

Student Assistant

The Student Assistant will be performing lab-work involving sample preparation and characterization using FT-IR, DSC, TGA, NMR and optical microscopy, among others.

The vacancy is for a full- or part-time (minimal 2 days per week) job for a period of 4 months starting immediately. The student has to be year 2 or above in his/her study, be independent, consistent and careful in his/her work, with good communicational skills.

The payment for the job is according to the standard rates for a Student Assistant job.

For more information and application for the job, please contact Dr. Christina Christova (christina.christova@ptgeindhoven.nl).
